- Overcome your fears and self-doubt
- Develop a positive self-image
- Set and achieve ambitious goals

- Build confidence and resilience
- Attract success and abundance

Doe's approach is based on the principle that our beliefs create our reality. If we believe we can achieve something, we are more likely to take the actions necessary to make it happen. Conversely, if we believe we cannot achieve something, we will sabotage ourselves and give up before we even start.

By pretending that you have already achieved your goals, you can create a positive feedback loop that will lead to real success. When you act as if you are successful, you will start to feel more confident and capable. This increased confidence will lead to better decision-making, more effective action-taking, and ultimately, greater success.

Fake It Till You Make It is full of practical advice and exercises that will help you to overcome your fears, develop a positive self-image, and achieve your goals. Whether you're struggling to start a business, land your dream job, or simply improve your relationships, this book will show you how to fake it till you make it.
